
E With real eviction the confidence ordering decays too, not only its level
1 → 60 min: Δ AUROC -0.073
[-0.143, -0.003], p = 0.039
recall questions
(evidence in the window)
no-evidence floor (prior arm)
chance
the change is the finding, not the level: by 60 min the ranking is barely better than with no evidence at all.
